September 2018 - July 2023

GCSE

5 Grade 7s, 2 Grade 8s and 2 Grade 9s - including grade 9 in Computer Science and English Language and grade 8 in Mathematics.

Relevant Experience

British Airways - London Heathrow, UK

April 2026

Business Spring Week

During this 3 day placement, I gained insight into the different strategic and operational challenges that are made everyday to make BA fly. I heard from speakers across the business, who shared what their work involved and some of the key decisions they make. I worked in a group of 5 to deliver a presentation to a panel of BA judges, where we focussed on enhancing the app experience by creating a 'digital assistant' with features such as baggage tracking, delay assistance and meal pre-ordering, along with considering relieving stress on front-line staff in times of disruption. This allowed me to engage in teamwork, developing my active listening, accountability, public speaking and confidence skills alongside analytical thinking as we developed our improvement strategy. This experience fostered significant teamwork, enhancing my active listening, accountability, public speaking, and confidence.

Moorland View Care Home - Remote

April 2020 - December 2023

Website, Systems and Social Media Editor (ad-hoc/freelance)

Working in a family business, I helped manage and organise our website, ensuring it was relevant and up-to-date; this was particularly important during the Covid-19 pandemic, where vital information was communicated. I also ensured systems were running smoothly, providing technical support where needed. I also developed marketing skills, using social media to advertise the business along with customer service and engagement. This role taught me valuable skills of teamwork and digital communication, working remotely.

Extra Curricular

Nationwide Building Society Hackathon

October 2025

I worked in a team of 6 people, working together on a project, during a period of 2 hours, which promoted accessibility and tackled the digital divide in financial literacy and fraud prevention. I learnt vital presentation and public speaking skills, as we presented our idea to a panel, along with teamwork and task designation & decomposition.

Forge Digital Work Experience

2024 and 2025

Cybersecurity Job Simulation - Mastercard

Digital Business Services - HSBC

German Language Course - Biberach an der Riß, Germany

July 2024

I underwent a "one-way" exchange trip to Germany where I spent a week engaging in a daily language class of 4 hours, along with cultural activities in the afternoons and evenings each day. As well as particularly enhancing my spoken skills, it also allowed me to immerse myself in the culture and learn about local customs and traditions by living with my host family.

Documentation & Skills

Proficient in Microsoft Office and Google Workspace - having had experience as an organisation admin in Google Workspace.

Good at communicating and working in a team, with effective presentational and organisation skills established through experience.

Full UK Driving License, British and Bulgarian Passport Holder
